

## 2. Demographic Profile

### Population Size, Growth and Distribution

\*The earliest population estimate was in 1650 which shows that the population of Cagayan de Oro was barely 900. Records show that in 1903, when the first census was taken, the population of *Cagayan* was placed at 10,937. This excluded Iponan (*former Municipality of Bukidnon Province*) and Gusa (*then a barrio of Agusan Municipality, Bukidnon*).  
(*N.B. Iponan, Gusa, and Agusan are now barangays of this city.*)

\*\*In 1939, the population had reached 53,194 which covered Barrio Sungay and the Poblacion of the former municipal district of Lourdes. (*N.B. Sungay and entire Lourdes are now barangays of Alubijid, Misamis Oriental*)

Table 7 : **Actual Population, 1650-2015**

Year (Actual Census)	Population	Year (Actual Census)	Population
1650	68,026	1970	128,319
1750	900	1975	165,220
1879	1,660-3,000	1980	227,312
1897	11,000	1990	339,598
1903	11,029	2000	461,877
1918	21,179*	2010	602,088
1939	28,062	2015	675,950
1948	48,084**		
1960	46,266		

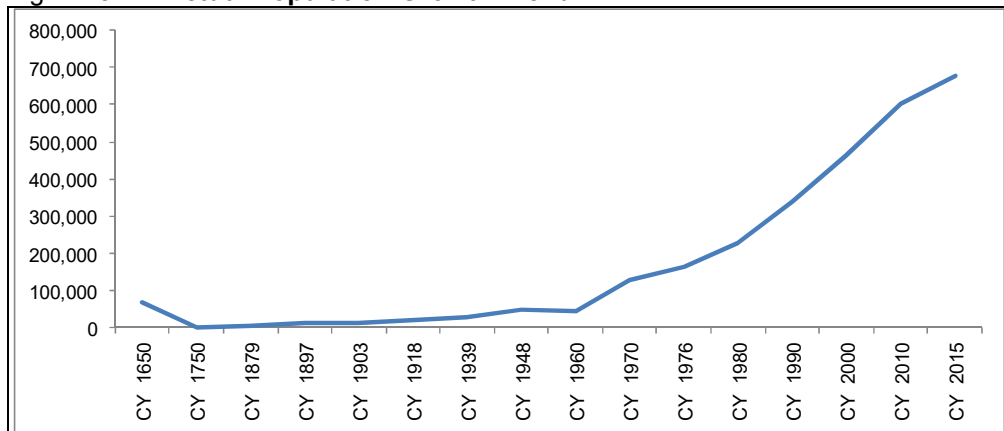

Source : *National Statistics Office (NSO)*

*Entries in 1903 and 1939 have been adjusted for consistency with the present territorial coverage of the City.*

\* *Adjusted to include the population of Bukidnon municipalities, viz: Iponan, Gusa and Agusan*

\*\* *Adjusted to exclude the population of Lourdes Poblacion and Sungay, now barangays of Alubijid, Mis. Or.*

Figure 3 : **Actual Population Growth Trend**

Source : *National Statistics Office (NSO)*

Figure above shows that the City's population has been increasing since the first censal year 1903 except in 1960. After 1960, the City posted a significant increase in population mainly brought by high birth rate and migration. People from neighboring provinces, cities and municipalities are coming to the city for job and income opportunities.

**Table 8 : Population with Birth and Death Occurrences, 1987-2015**

Year	Population	Births	Deaths	Natural Increase

Table above shows the occurrences of birth and death in a continuous censal year. From 1987-1992, 2004-2005 & 2008-2015, births and deaths during this year is directly proportional and deaths and birth is inversely proportional during the following censal year 1993-1999, 2002-2003 & 2006-2007 respectively.

Table 9 : **Cagayan de Oro City and Region X's Actual Population Count, 1970–2010**

Source : National Statistics Office (NSO)

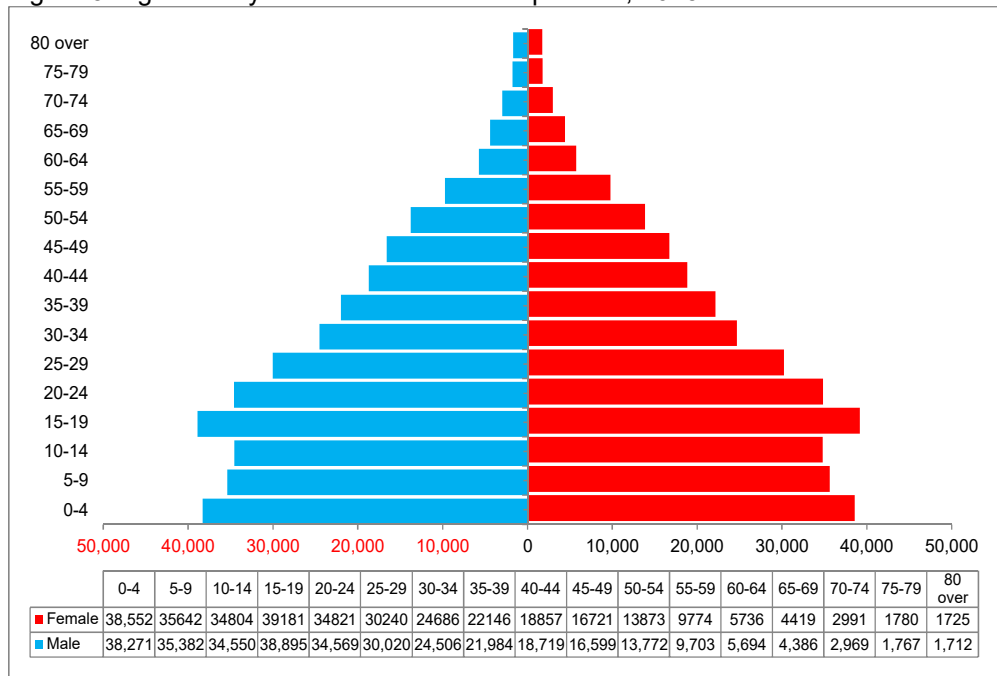

Figure 4 : **Population Growth Patterns of Cagayan de Oro, Region X, Philippines, 1970 - 2015**

Source : National Statistics Office (NSO)

Cagayan de Oro posted a total projected population of 675,950 persons as of 2015. This represents an increase of 73,862 persons over the total actual population of 602,088 persons in 2010. The 2015 figures translated to an annual population growth rate of 2.23 percent which is higher than that of the Regional Growth Rate of 1.68 (2010-2015 actual population counts). Based on the present growth rate, the population will double in the span of 31 years or in 2046.

Figure 5: Age-Sex Pyramid of Household Population, 2015

As of 2015, the City has 683,793 total household populations with an average household size of 4.4. The household population comprises 341,074 males or about 49.9 percent and 342,719 females or 50.1 percent from the total households. Above graph shows a slight difference in terms of sex ratio which is 99.5 males for every 100 females. About 30.60 percent of the total household population belongs to the age group 0-14 years old. Productive population (ages 15-64 years old) comprises 66.05 percent, while 3.4 percent of the household population are elders (above 65 years old).

The proportion of household population belonging to age group 0-4 is 10.57 percent and this is made up of 5.27 percent male and 5.30 percent female.

Youth dependency ratio (ages 0-14) is 46.33 percent while the elderly dependency ratio (65 years old and over) is 5.08 percent from the total household. Overall, the dependency ratio of the city reached 51.41 percent. This indicates that for every 100 persons ages 15-64 years old (working age population), about 51 are economically dependent, (46 young dependent and 5 old dependents). This ratio is also lower compared to the 2000 figure of 61 persons per working age population. This decrease in dependency ratio indicates that more people are in the work force.

Source : National Statistics Office (NSO now Philippine Statistics Authority-PSA) & City Planning and Development Office **Note: Population count may differ due to rounding of numbers**

Based on the 2015 Census, the City showed a slight increase in population. Migration and high birth rate are contributory factors in population growth. People from neighboring provinces, cities and municipalities come to the city for jobs and livelihood opportunities. Developing subdivisions in the city is an added attraction for people to settle in Cagayan de Oro.

Cagayan de Oro City is a highly urbanized city which is comprised of 80 barangays. Among these, barangay Carmen is the most populated barangay, followed by barangay Lapasan, Balulang, Kauswagan, and Bulua. The rest of the barangays shares less than five percent each to the total population of the city as of 2015

The average population density of the city is 11.88 persons per hectare as of 2015. The most densely populated barangay is Barangay Macabalan with a population density of 466 persons per hectare. It is followed by Barangay 15 (Poblacion) with 366 persons per hectare, and Barangay 35 with 347 persons per hectare. Barangay Besigan has the lowest population density of about 0.30 persons per hectare.
